OBJECTIVE

To start my career as a AI & Frontend Developer, where I can apply my knowledge of Python, JavaScript, React, SQL, and Generative AI, enhance my technical skills through real-world projects, and contribute effectively to the success and growth of the organization.

EDUCATIONAL CREDENTIALS

B.E. Computer Science and Engineering, RVS School of Engineering and Technology Dindigul CGPA: 8.2	2022 –2026
HSC , St Antony's Higher Secondary School Kosavapatty Dindigul Percentage: 78%	2021 – 2022
SSLC , St Antony's Higher Secondary School Kosavapatty Dindigul Percentage: 90.8%	2019 – 2020

INTERNSHIPS

• React Project(Frontend) , MenThee Technologies building and improving responsive UI components.	02/2025 – 03/2025 Chennai, Tamil Nadu
• FullStack Development , Futurix Technologies Contributed to frontend and backend development of web applications and gained hands-on full-stack development experience.	07/2025 – 08/2025 Madurai, Tamil Nadu

SKILLS

Programming : Python, React JS, Java(Fundamentals)
AI/ML: Machine Learning, Deep Learning, NLP
Generative AI: LLMs, RAG, Prompt Engineering, Fine-Tuning
Query Language : SQL
Data Analysis : Data Visualization & Exploratory Data Analysis
Web Technologies: HTML, CSS, React.js
Tools & Software : MySQL, GitHub

SOFT SKILLS:

- Team Player
- Research & Exploration
- Critical Thinking

LANGUAGES:

- Tamil (L,S,R,W)
- English (L,S,R,W)

PROJECTS

Adaptive API Rate Limiter • Adaptive API Rate Limiter for API Abuse Prevention Based on Traffic Behavior Analysis is a Spring Boot-based system that monitors user API requests in real time and dynamically controls access based on request behavior.	03/2026-04/2026
Social Media Analytics & Insights • Social Media Analytics & Insights Analyzed social media data using Python to uncover engagement trends, audience behavior, and actionable insights through data analysis and visualization.	06/2026-06/2026
AI Movie Recommendation System • Developed a content-based movie recommendation system using Sentence Transformers and cosine similarity to recommend movies based on titles, genres, and descriptions. Implemented pre-generated embeddings, similarity scores, movie posters, and an interactive Gradio interface. • Technologies: Python, NLP, Sentence Transformers, Cosine Similarity, Pandas, NumPy, Gradio.	07/2026-07/2026

CERTIFICATIONS

- **Salesforce Certification:**Agentforce Specialist
- Naan mudhalvan certification for my academics
- Finalist in **STARTIFY:** business planning
- Ui path certificate for RPA automation
